The Next-Generation Digital Screen Maker

GOCCOPRO QS2536

A revolution in the screen-making process
using the power of digital.

Perforation density

1,200
dpi

Available for
automatic
T-shirt screen printer

25" × 36"

Precise Image Quality and Accurate Registration using RISO Dry Thermal Screen Making System.

GOCCOPRO QS2536

The special thermal head has an applied energy equivalent to 600dpi that excels in solid printing, and a 1,200dpi perforation density for detailed work. Using a high mesh count screen master, fine gradations in printing become possible. Comes with a line up of screen masters for various applications.

* Frame sold separately.

A large-sized frame (25" x 36") can be set on an automatic T-shirt screen printer.

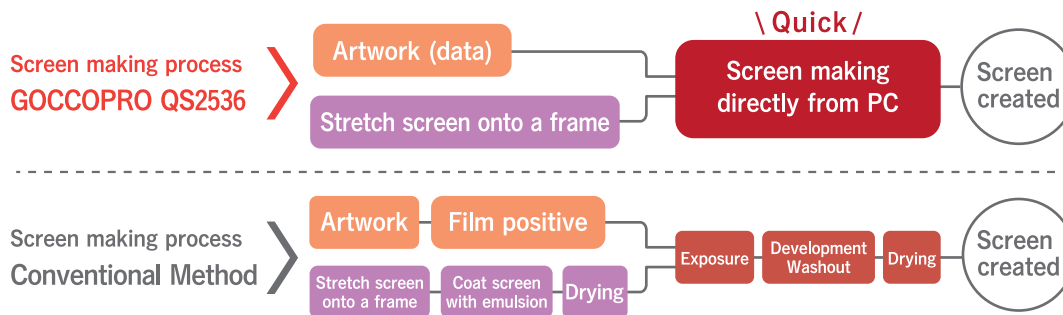

* With a frame thickness (width) of 20mm
Maximum image area: 457mm x 759mm

RISO Dry Thermal Screen Making System

— The New Screen Printing Standard —

RISO Dry Thermal Screen Making System is a CTS* system with a thermal head that heat-perforates a screen master of mesh laminated with film. Enables low-cost, speedy screen making even for sample and small-lot production, and across a wide range of jobs, from multi-color T-shirts to name plates.

Environmentally aware

- Less electricity consumed.
- No waste water generated.
- Powder coated body.
- No use of solvents.

* Computer To Screen
